API Usage

/Clues

- Url: `/api/clues`
- Options *All options are optional:*
 - `value` (int): the value of the clue in dollars
 - `category` (int): the id of the category you want to return
 - `min_date` (date): earliest date to show, based on original air date
 - `max_date` (date): latest date to show, based on original air date
 - `offset` (int): offsets the returned clues. Useful in pagination

/Random

- Url: `/api/random`
- Options:
 - `count` (int): amount of clues to return, limited to 100 at a time

/Final

Presents random final jeopardy question. *Note: all final jeopardy questions have null `value`*

- Url: `/api/final`
- Options:
 - `count` (int): amount of clues to return, limited to 100 at a time

/Categories

- Url: `/api/categories`
- Options:
 - `count` (int): amount of categories to return, limited to 100 at a time
 - `offset` (int): offsets the starting id of categories returned. Useful in pagination.

/Category

- Url: `/api/category`
- Options:
 - `id` (int): *Required* the ID of the category to return.

About

This is in large part a project to learn a bit about screen-scraping and creating an easily consumable set of services for public consumption. I will be offering this free of charge, but on a small Heroku instance until sufficient demand exists. **Production use is at your own risk.**

Random Question

Difficulty	300
