Adding Springboard to Your Software Engineering Resume

Not sure how or if you should include Springboard on your resume? Here are a few tips and formatting suggestions to make including Springboard an easy process.

How to Add Springboard to Your Resume

You can list Springboard in your Education section or Experience section — or you could list it in both! Check out the descriptions below and add them to the resume section of your choosing. If you decide to list Springboard in both sections, include the full description below *only* in the Experience section.

1. **Formatting and Content**

❖ <u>**Education section**</u>:

  Springboard Software Engineering Career Track, Certification   2020
  9-month intensive course in Software Engineering methodologies and technologies
  Portfolio Projects: [Link to your portfolio]

❖ <u>**Experience section**</u>:
  * If you include Springboard in the Experience section of your resume (at the recommendation of your career coach or mentor), make sure to notate that you are a Student or Fellow so they don't accidentally assume you're an employee.

  Springboard Software Engineering Career Track - Student
  Description: 700+ hours of hands-on course material, with 1:1 industry expert mentor oversight, and completion of 4 in-depth portfolio projects. Mastered skills in front-end web development, back-end web development, databases, and data structures and algorithms.

  [After the above description, list your capstone projects. Provide (1) the title of the project as well as the (2) objective, (3) tools used and (4) results/outcomes of the projects.] * Add Github link below your projects
