React + Redux Exercises

Part 1 - Meme Generator - Redux

Your application should do the following:

- Allow for the creation of a meme with a top and bottom text
- Allow for the removal of memes
- Your memes should be stored in Redux

Part 2 - React / Redux Todos

It's another throwback to your todo app! Instead of storing todos in React state, move them to Redux state.

Your application should do the following:

- Allow for the creation of todos
- Allow for the deletion of todos

Be thoughtful about which component(s) need to *useSelector* to get data from Redux state.

Further Study

- Add unit tests for your reducers
- Add functionality for updating memes
- Add functionality for updating todos
- Store your memes in localStorage
